

FIG. 1

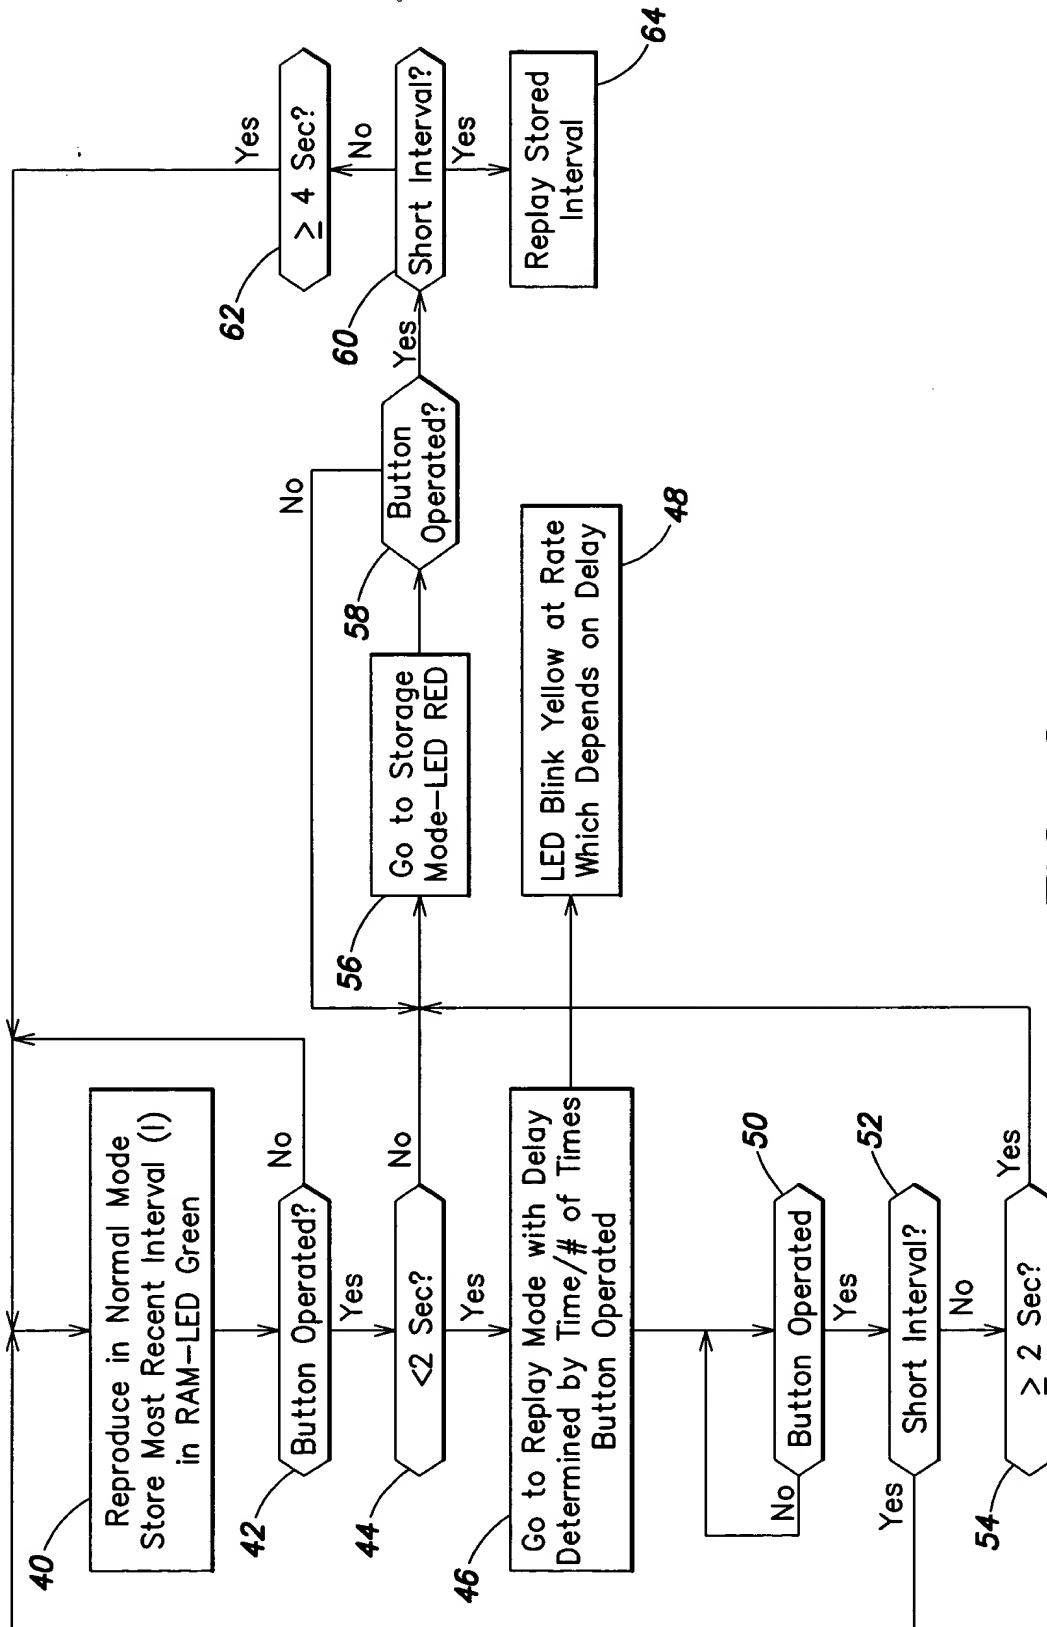

FIG. 2

LED Indicator/Button Pushes

COLOR	MEANING	NOTE	BUTTON PRESSES
GREEN	Ready	Has been reset to live	Each rapid button push increases amount of replay, 10 seconds, 20s, 40s, 90s, 3 minutes (or max) – LED changes to yellow. A long button push >2 seconds initiates Commercial Eliminate Mode – LED blinks.
GREEN (Blinking)		Commercial eliminate mode	Quick pushes in this mode skips forward 15, 30 seconds, etc. Long button push >2 seconds resets to live – LED stops blinking.
YELLOW (Blinking)	Replaying	Blink speed reflects length of time delay	Rapid push restarts previous delay; Two rapid pushes replays at slightly accelerated rate and eventually catches up to live. Long push (>2.0 sec) saves information – LED changes to red. Long push >4 seconds resets to live – LED changes to green.
RED	Important Information Stored	Does not shut off with radio or station change	Rapid push replays stored information, two rapid pushes slows down replay, three rapid pushes speeds up replay. Long push (>4.0 seconds) resets function – LED changes to Green.
RED (Blinking)	Replaying	Replaying other than original speed	Long push (>4 seconds) resets function – LED changes to green.
